What should you restrict in your diet and how can you replace with it other foods?

Stop

- Intake of saturated fats e.g. Full cream milk & Its products (Cheese, butter, ghee)
- Mayonnaise and sour creams dressing as these are concentrated fatty foods which added extra calories.
- Intake of refined sugar and desserts i.e ice creams, cakes, cream pastries, chocolates, pudding, burfi, khoya preparation.
- Canned, fried foods and ready to eat foods, i.e potato chips, namkeen, poories, parathas , samosas and pakoras.
- Avoid soft drinks and fruit juices as they will add extra calories.
- Smoking & alcohol should be stopped.
- Avoid coffee & caffeine containing products.
- Do not fry chicken, fish or any vegetables.

Go

- Choose toned or skimmed milk for all milk preparations.
- Use oil like soyabean, rapeseed, mustard or olive for cooking use only 2-3 teaspoons in a day.
- Check with your dietician for use of sugar free substitutes.
- Fish or chicken can be taken once a week.
- Choose healthy snacks like sprouted dals as black chana, green gram, moth which can be included in salads, raitas, sandwiches etc.
- Exercise regularly (45 mins).
- Drink plenty of water approx, 8-10 glasses a day. You may substitute water with other fluids like buttermilk, tea, coffee, fresh lime water.
- Eat fish as they have high omega-3 fatty acids which help in reducing cholesterol.
- The diet should be rich in fibre foods like raw salads, green vegetables and whole grains.
- Reduce the intake of salt in the diet in case of hypertension. (avoid salt rich foods like salted biscuits, papads, pickles, canned food & fish.)
